PROJECT(S)

URL Shortner

MERN | Tailwind CSS | Nginx

Developed a fully functional Responsive URL shortening platform

- Implemented Authentication
- Implemented features for IP address tracking and visualization of user data through interactive graphs.
- Link: [FoxyURL Shortner](#)

File Share Application

MERN | Tailwind CSS | Nginx

Built a file-sharing platform for uploading files and generating shareable links.

- Added an auto-delete feature to automatically remove files after a set time.
- Designed a user-friendly interface for file uploads, link creation, and code snippet sharing.
- Link: [File Share](#)

Code Share Application

React | FireBase

Created a code-sharing platform for uploading and sharing code snippets.

- Generated unique URLs and QR codes for each snippet.
- Used Firebase Realtime Database for storing code snippets.
- Link: [Code Share](#)

ACHIEVEMENTS

Smart India Hackathon - 2023 Participant

- Developed a multi-language translator using chatGPT for real-world problems in a team-based competition.
